

FP OilStop

by FullSulate®

FP OILSTOP™ IS UNIQUE AMONG OIL SPILL REMEDIATION SOLUTIONS

What is FP OilStop™?

FullSulate Ltd. is a global producer and distributor of FP OilStop™, a 100% natural solution designed for the effective remediation of oil, oil derivatives, grease, and fat. Engineered to efficiently remove hydrocarbons from water, soil, sand, and hard surfaces, it enables rapid cleanup while minimizing environmental impact. With its cost-effective and eco-friendly approach, FP OilStop™ supports sustainable ecological restoration and enhances environmental protection efforts.

What makes FP OilStop™ unique?

100% NATURAL & NON-TOXIC

Safe for the environment and human handling.

FAST-ACTING ADSORBENT

Binds oil within 2 minutes, removing 98% of contaminants from wet and water surfaces.

VERSATILE APPLICATIONS

Effective on water, sand, soil, and hard surfaces.

COST-EFFECTIVE & EASY TO USE

Requires fewer resources than traditional methods, cutting costs on manpower and equipment.

HAZARD NEUTRALIZING EFFECT

Transforms hazardous waste into controllable waste both on land and in water.

ISO 16221 COMPLIANT

Meets international standards for marine biodegradability and water quality.

HOW FP OILSTOP WORKS

- **Effectively adsorbs** hydrocarbons (C5-C40) from water, sand, and hard surfaces.
- **Forms a solidified mixture** that can be conveniently removed using sieves, skimmers, or pumps.
- Minimizes environmental impact by treating naturally any surface including water and sand.
- **FP OilStop™** has three variants: **Float**, **Sinking** and **Surface**

KEY APPLICATIONS

- **Oil spill response** – Supports emergency cleanup for marine and inland spills.
- **De-oiling & wastewater treatment** – Removes oil efficiently from various surfaces and water.
- **Sludge waste stabilization** – A 100% natural alternative to chemical stabilizers.
- **Industrial cleaning** – Effective for hard surface oil spill cleanup.
- **Machinery & equipment maintenance** – Ideal for degreasing workshops, factory floors, and equipment.
- **Environmental benefit** – FP OilStop™ significantly reduces hydrocarbon and volatile organic compound (VOC) concentrations in treated water, promoting sustainable remediation.

PROVEN PERFORMANCE

- **Superior adsorption** – Outperforms traditional methods in effectively capturing hydrocarbons.
- **pH balance protection** – Maintains natural water pH for environmental safety.
- **Proven efficiency** – XAMK University of Applied Sciences tests confirm its marine effectiveness.
